DETAILED ACTION

Allowable Subject Matter

1. Claims 1-4 and 6-28 allowed.
2. The following is a statement of reasons for the indication of allowable subject matter.

Claims 1, 4, 15, 18, and 20 recites, inter alia, a method/apparatus of generating interrupts in a network interface card comprising "determining a second time delay in response to a received data frame", "determining whether the second time delay has passed", "generating the interrupt if the second time delay has passed", and "wherein the second time delay is a time interval between reception times of two data frames and excludes processing times of the data frames". Prior art of record do not teach or suggest, either alone or in combination, the aforementioned limitation, nor would it be obvious to modify those references to include such limitation.
